

Workshop

Computational Arithmetic

Geometry

University of Sydney

June 18 – 20, 2003

An informal workshop, concentrating on computational arithmetic geometry and related topics. It is intended to have a relaxed schedule of talks, with ample time and opportunity for informal discussion. The programme features lectures by the participants and an embedded general lecture on Friday, June 20, 2pm:

Galois theory and primality testing

Hendrik Lenstra Jr. (AustMS Kurt Mahler Lecturer 2003)

Participants: (at present)	Michael Bush	Hendrik Lenstra Jr.
	Nils Bruin	Alf van der Poorten
	Claus Fieker	Victor Scharaschkin
	Joost van Hamel	Ben Smith
	Bill Hart	William Stein
	David Hunt	Alexa van der Waall
	Martine Girard	Paul van Wamelen
	David Kohel	Mark Watkins

Registration: Registration is required for participants and is free. To register, contact the organizer, preferably by email.
